Description:

A deeply engaging new history of how European settlements in the post-Colombian Americas shaped the world, from the bestselling author of 1491.

Presenting the latest research by biologists, anthropologists, archaeologists, and historians, Mann shows how the post-Columbian network of ecological and economic exchange fostered the rise of Europe, devastated imperial China, convulsed Africa, and for two centuries made Mexico

City—where Asia, Europe, and the new frontier of the Americas dynamically interacted—the center of the world. In this history, Mann uncovers the germ of today's fiercest political disputes, from immigration to trade policy to culture wars. In *1493*, Mann has again given readers an eye-opening scientific interpretation of our past, unequalled in its authority and fascination.
