**Description:**

John Muir, a young Scottish immigrant, had not yet become the famed conservationist whom he liked to call "John o' the Mountains" when he first trekked into the foothills of the Sierra Nevada not long after the end of the Civil War. Having caught a glimpse of such magical places as Tuolumne Meadows and El Capitan, Muir ached to return, and in the summer of 1869 he signed on with a crew of shepherds and drove a flock of 2,500 woolly critters toward the headwaters of the Merced River.

The diary he kept while tending sheep forms the heart of *My First Summer in the Sierra*; published in 1911, it enticed thousands of Americans to visit the Yosemite country. The book is full of the

concerns Muir would later voice as America's foremost preservationist and wildlands advocate, which would bear fruit in the creation of several national parks and monuments. And it resounds with Muir's nearly pantheistic regard for the natural world: with celebrations of the Sierra's lizards that "dart about on the hot rocks, swift as dragonflies," its mountain lions and tall trees and fierce thunderstorms and bears; with Muir's overarching awe for places that civilization had yet to tame. Though perhaps a little purple by modern standards, Muir's book continues to inspire readers to seek out such places for themselves and make them their own--and as such it stands among the enduring classics of environmental literature. --*Gregory McNamee* --This text refers to the edition.

**Review** "The richness of his writing roots deeper into the terrain than any other wilderness writer known to me." Los Angeles Times "Muir's book continues to inspire... it stands among the enduring classics of environmental literature." Gregory McNamee "As more and more of us grow aghast at what we have done to the world we started with, Muir's reverence and devotion will seem keenly germane, and our regret may be transmuted into a fight for the future." Edward Hoagland" --This text refers to an out of print or unavailable edition of this title.
